Features & Options:

The 5100 Series Interchange is a Thread-To-Connect coupling that features a Connect-Under-Pressure design. It also features No-Spill Valving that makes it environmentally friendly. This Hi-Flow Tubular Steel Valving creates less turbulence, which results in a Low Pressure Drop. These qualities make the 5100 Series Interchange suitable for a wide range of applications including; Construction, Forestry, Oil & Gas Industries, Marine/Defense, Transportation, Utility, etc.

This coupling is NOT rated for continuous hydraulic IMPULSE applications.

Dust Caps and Plugs play a vital role in QD longevity as they help to keep out contaminants that can harm the efficiency of your hydraulic system.

- Thread-To-Connect Heavy Duty Wing Nut Design makes Connection and Disconnection Easy.
- Hex Nut Couplers are in the Master Listing Pages.
- Brass Body with Steel Nut, Stainless Steel is Available.
- Connect-Under-Pressure Design.
- Flanged Bonded Valve Prolongs Coupling Life and Provides Minimal Fluid Loss and Air Inclusion.
- Hi-Flow Tubular Valve Increases Flow by Reducing the Turbulence That Causes Pressure Drop.
- Dust Seal Keeps Out Contaminates and Offers Visual "Connected OK" Feature.
- Bulkhead Mount Design w/ Flange.
- Standard Buna-N Seal, Optional Seals are Available.
- Female Pipe (NPTF) Standard, Other Threads are Available.

Your Quality Connection
